

In-game related questions:

Were there any clues we missed? For instance, there was one more subsidiary and project that we only saw question marks for - did we miss out on seeing these, or were they never meant to be shown? This was possibly Takeda and the TENGU?

The major missing subsidiary was indeed Takeda (producers of the Tengu)

What were we to get from some of the unused clues, like the hippo images and unused tarot cards?

The tarot cards were a clue towards the Yori's dream website. I forgot how it was meant to be solved. The Hippos were there just to throw everyone off.

How did Eric die? Was it from the ATheNA or something else?

He died in the same way John did. Lack of sleep eventually drove him mad and died (fatal familial disease symptoms)

Who was Rachel Silverman and what is the story behind her?

She was one of the people kidnapped who was experimented on. However she did manage to contact the outside and give information to Kitsune (who at first raided the ES trying to save what they believed were just monkeys or lab rats)

Who was the Yori impostor?

Nobody important, it was misinformation from Junker from the start.

Did Yori in fact die?

As said above, she died the first time.

Did we miss anything exciting by not talking to Yori on the phone during the Junker attack on Takeda?

A call from Yori and hearing the actual strike teams break into the building and stuff.

Who was Yori's Russian friend?

Russian Kitsune members who found information and sabotage the first Pisces satellite.

Who was sneaking the clue images into the Junker websites and giving information to Yori?

The Russian friend. She had infiltrated the organization, but eventually was killed.

What happened to John Blacksmith? Did he die too?

Yes, same way Eric died.

What was the deal with all of the music references, such as Muse and Wagner?

Muse was Eric's favorite group. Most of the song lyrics indeed have a form of clue in them. Wagner music seemed to fit the bill, however it would have been more appropriate for the next ARG, so you might see it again.

Did all of the Junker folk get rounded up or can we expect more in the future?

The next ARG is a completely new story.

What was actually ATHeNA? What was 'ATheNA' short for?

ATheNA was how the brain retained long term memory (look up Memory RNA). The name was not short for anything, but it had several references in that Athena in Mythology was not born, but simply came from the head of Zeus, and Athena was also the goddess of Wisdom.

What was the clue with Verdandi? Was it useful to any of the good guys?

Saved a lot of time for MI6.

What did K.O.I. stand for, what were they and what is it the reason for Yori to have us look for Koi?

KOI was just the name of the project. HOWEVER an important thing was not noticed by some people who got emails or chats. At one point Yori said that 'one of the Kois was her very own Koibito'. Koi is short for Koibito in Japanese, which means lover. So, Yori was doing all of this in revenge for the ES having kidnapped and killed her boyfriend.

What was TENGU an acronym for?

Someone made a really awesome one in German, but he didn't write it down and forgot about it - ___ -

Is there any more information about the Junker subsidiaries that didn't get their own websites (Javelot, UrMiCo, etc)?

They were mainly linked to Aurora, UrMiCo was located in known Uranium mines in South Africa (how they made the nukes), The Russian one Developed and controlled the EMP satellites, while Javelot was the space division, rockets, satellite manufacturing etc.

Who was X? Who was VI?

X was the leader (Former East German General), VI, was a much lower level officer in charge of communications.

What did Heim and Mielke have to do with Junker?

They were prominent members of Junker, which was partly composed of the former East German Elite.

Was there a connection to the Illuminati?

Yes, it merged with the dissatisfied DDR elites after the fall of the Berlin wall. However the Illuminati was just a bunch of bored billionaires who eventually were killed to merge their companies with Junker.

Why were a lot of the images on John's blog named for places that had nothing to do with the pictures?

That's when the Game imploded for the second time, so they lost the meaning they were meant to have.

Were the images for the crossword chosen for a reason?

Some were, but I can't remember them off the top of my head right now.

Which Aurora satellite went off?

Pisces II

What was on Blacksmith's CD?

Evidence of the EMP bombs.

Why did Genesisdeath only send the message to John?

It was meant to send it to everyone, but the email did not work as it was meant to be.

Meta-related questions:

Did you ever see Tony at some of the drop locations?

Might have, but I don't know if it was Tony or other people who played the game at the start

Who was the model of Yori Tanaka?

; -)

How many people were participating in the ARG, especially toward the end? Were there still other groups outside unFiction?

There was at least 25 people playing the game, considering they all emailed the different accounts. However I have no idea where they were from, a lot of IP addresses were from Korea.

Was this the original design for how the game would play out, or did you have to reorganize after starting at A&M?

Not at all. The game imploded 2 times. It was meant to be a local ARG, but the majority of the locals did not understand the concept and ruined the game. However the game ended up in Unfiction somehow and we decided to turn the game into an experiment rather than ending it. So we took what we had and created a much larger story since we didn't have to worry too much about local participation (all of this on the go).

We also lost a lot of our actors, so you guys missed a lot of stuff that we meant to have, specially at the end. :(. but it was the best we could do. This won't be a problem on the next game since we are launching it towards the ARG community from the start. Don't forget to make a wiki. you'll need it.

Would it be possible to create an archive of all the sites and content for us to access?

Sadly because of the problems we had, we can't do that for Con08.

Can I have your autograph, XIII? (can't remember who asked that one)
Ummh... I guess.

How did you get the footage of the Tengu? Did you make that CGI? Is it CGI?

We made some, but some was existing CGI that someone found for us.

You're going to send us all the trailhead for the next game, right? Wink (can't remember who asked that one either)

We will try. If we miss someone we do apologize. keep an eye on your spam just in case.

What is V.I.T.D.?

That's the next game that will be launched sooner than you might think. (realllllly soooooon)

AND anything else you'd like to divulge would be greatly appreciated!

Just keep an eye on your email. And if you find something like account names to be 'TheJunkerCorp' or similar, consider it to be OOG. The same if we missed something and the files contain the name of the maker. (specially with the initials JFP, BOTE and VD) Those are OOG and not meant to be there.
