

The TR. Corp was founded in late 2003 by Aaron—they were conscripted by the Military to create the 'Super-Solider' vaccines. By 2006 they had created over 30 'batches' of the SS Vaccine, and distributed it to over 25,000 Test Subjects [both Military and Non-Military personnel].

Now, when the government contacted Aaron and asked him to stop producing the Vaccine—that their funding had been cut, it just set off the chain reaction that leads us today.

In 2008; TR Corp bought several thousand acres of land just outside of New Haven, CT; Where they eventually built The Obelisk; a massive 100+ story building wherein they produced more 'batches' of the SS Vaccine.

2009;

March: their size double from 30,000 to 63,000, they begin to send 'missionaries' to densely populated urban and sub-urban neighborhoods, adding another 50,000 to their ranks.

July: on the 4th of July the United States of America filed a lawsuit against TR Corp. for Monopolizing the market place, embezzlement, and several other minor charges. Aaron stepped up his game.

November: TR corp. orders all its 'test subjects' to storm the streets of Manhattan, Boston, and L.A. the government responds by declaring Martial Law.

2010; The Economy in the United States slowly begins to dip to all time low.

2011: TR corp. spreads to Europe and Asia.

2012: The war begins.
