

Case ID: 00xx00

## Patient Information

**Last Name:?** (Mother May)

**First name:** Margret

**DOB: ?**

**Gender:** F

**Batch ID:** LM-X00C

**Pre-Injection:** Patient is suffering from Wernike-Korsakoff's psychosis. Little is known about her.

### **Injection (8/3/10):**

Immediately the subject slipped into a coma. Her heart rate accelerated to 145BPM. The Staff have reported strange feelings as they walk into her room. The reports vary, however 85% of the male nurses & doctors who have walked into her room have reported feeling a looming malevolent sensation, where the Female nurses & doctors have reported an overall sense of safety—they now passionately call her Mother May.

The patient is currently on Life Support until further notice.

### **Injection II (9/01/10):**

The section injection has been voided. The patient has regained consciousness; however she has lost the ability to speak. The patient has shown overall improvement in her physical, mental and psychic abilities, despite her inability to speak.
