

# QABG-H3 Solution

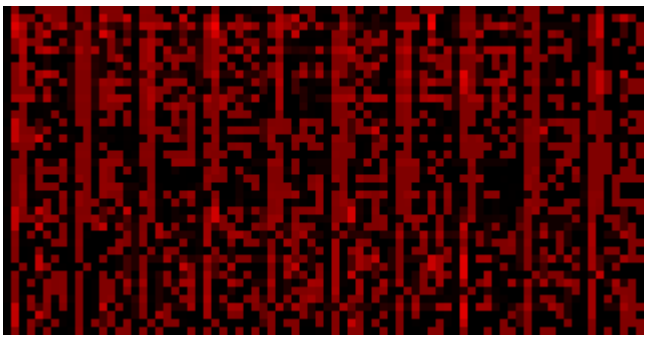

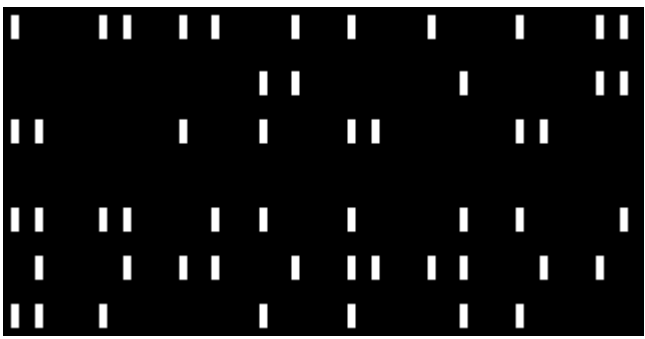

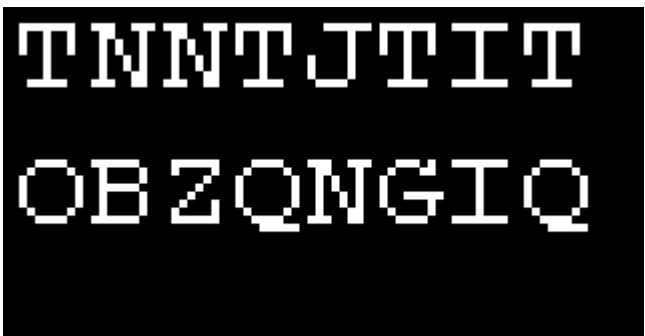

To find all of the Easter eggs in this image first requires looking at the RGB channels individually. Each channel then contains eight levels of information. Each level is a binary image multiplied by a scalar value,  $2^{n-1}$ , where  $n$  is the level (1-8). The individual color channels were created by summing all eight levels for a given channel (with a maximum possible value of 255). To find each individual binary image essentially involved reversing the process using Photoshop. The highest level (value 128) is the same for all three color channels and results in the previously discovered binary encoded passage:

“One final word: thank you to all the players of ‘intimation’ for your patience and dedication! Honestly, the story would not have been the same without you. Essy / Naira thanks you for rescuing her from that evil scorpion. As a thank you, here are some more navpaths: AXIZTYNGRDPJUAXN, JQTFCCBKZLJWDCHF, IZYCUZJHHVTNGXJG, CHYMNBAHCJIRUPKH, WMKLCIJYWJGMEAOK, ANULCSWZPHXVUJIM, SXLGLDXLEIPADFRU, YZBBBGTKQUHYFKXU”

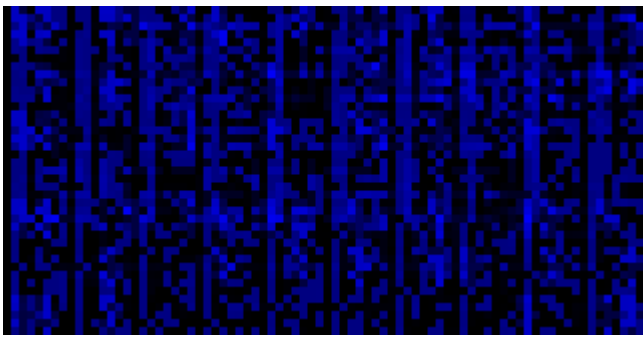

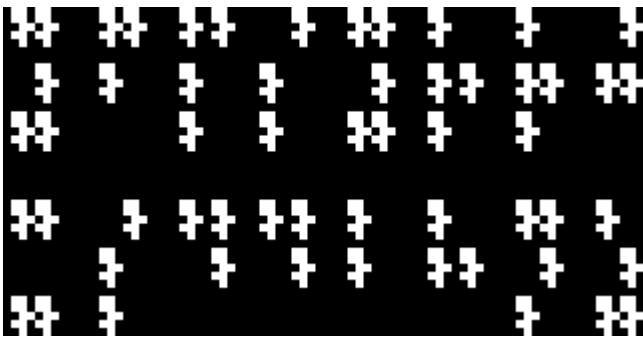

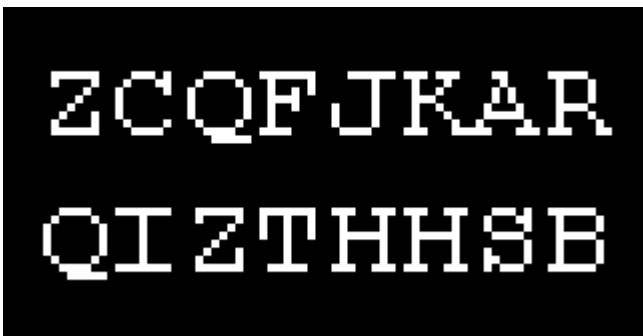

The following tables show the individual color channels and each binary level included. Level 6 for each remains to be solved, and one appears to possibly have a mistake (Green Level 7). As such, four eggs remain...

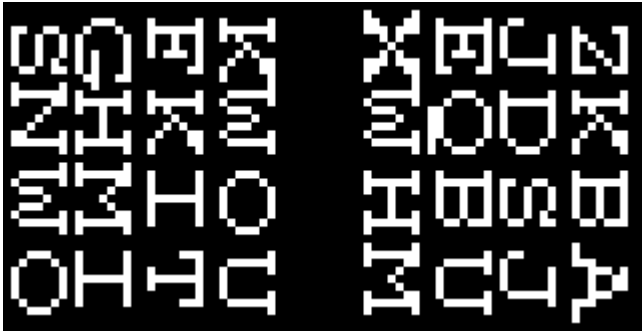

# RED

	<p>Red Channel</p>
	<p>Red Level 8 (128)</p> <p>Previously discovered binary data: <a href="http://forums.unfiction.com/forums/viewtopic.php?p=697020#697020">http://forums.unfiction.com/forums/viewtopic.php?p=697020#697020</a></p>
