

If you are reading this then I am mostly probably dead or as I've come to suspect something far worse and if you have come this far I can only hope that you are willing to go all the way. Perhaps you may end up rescuing me from my own sheer stupidity.

My book will give you a good base to work from, it is however just the tip of iceberg which AJ and I have stumbled upon. AJ said to me from the very start that our work could have far larger implications and of course I didn't believe him. To me it was just ancient history although I've had the feeling that something has been driving me from the very beginning and to quote a favorite author of mine:

“The most merciful thing in the world, I think, is the inability of the human mind to correlate all its contents. We live on a placid island of ignorance in the midst of black seas of infinity, and it was not meant that we should voyage far.”

That being said I hope for all our sakes you are not of the faint of heart and that you attempt to retrace my footsteps.

Most of my papers you will find with this envelope are in code due the fact they nearly all come from AJ, he thought our work should stay secret until the book was published. History shows us that Legends are hardly ever not in plain sight.
