

**DATE:** July 29, 2005

**MEMORANDUM FOR:** Operator  
Omnifam Foundation

**MEMORANDUM FROM:** Evergreen  
APO

**SUBJECT:** Field Operation (Special Assignment) - NH Rock

On Friday, July 22, I arrived in rural New Hampshire for my special assignment to locate a potential clue to the bombing. Based on the information at hand, I was able to locate the landmark in question.

On the reverse side of the rock in question, I identified the letters A and P. These letters clearly match the shrapnel accompanying the spiral message delivered by our unknown messenger and should be considered definitive proof of the authenticity of the message. Below is a photo of the rock's reverse side.

I believe this rock to be the "*craggy nexus of three*" and that these letters will prove to be the key to unlocking the encrypted message intercepted by Omnifam on or about 29 June.

I observed no signs of Follower activity in the area. Likewise, I could find no sign of Operative Johnahue and fear the worst.

Reverse Side of Rock
